Résumé (+ Use/Avantage): DE4440315 A formulation for the treatment of keratin fibres, esp. human hair, contains an active substance combination comprising: (A) a cationic panthenol deriv.; and (B) a carbohydrate chosen from mono- or oligosaccharides, (ur)onic acids (i.e. sugar acids), sugar alcohols, glycosides or quat. monosaccharides. A method for treating hair by applying the above formulation and then rinsing it out or leaving it to stand is also claimed. USE - The formulation is used as a hair restoring agent for repairing split hairs and may be added to shampoos, conditioners, styling lotions, hair cures, permanent wave solns., dyes etc. ADVANTAGE - Unlike cationic surfactant based prods. this agent does not accelerate the process by which hair becomes greasy, and they do not have to be applied to the hair as a sep. soln. since they are compatible with anionic surfactants. (Dwg.0/0)  
 Use / Advantage: DE4440315 I USE > - The formulation is used as a hair restoring agent for repairing split hairs and may be added to shampoos, conditioners, styling lotions, hair cures, permanent wave solns., dyes etc. I ADVANTAGE > Unlike cationic surfactant based prods. this agent does not accelerate the process by which hair becomes greasy, and they do not have to be applied to the hair as a sep. soln. since they are compatible with anionic surfactants.
